Your local **SolarBright** Dealer:

Introducing **MAXBREEZE**[®]

The latest in home ventilation technology, MaxBreeze[®] uses FREE energy from the sun, quietly drawing hot air from your roof cavity and helping keep your home cool in the warmer months.

How does it work?

Rotating design for optimum sunlight

The MaxBreeze[®] can be installed in any location and be easily rotated to face the sun.

Works all day and even at night*

Unlike older style roof fans which only work when the wind blows, MaxBreeze[®] works all day long, even on still and cloudy days.

Smart Operation

The new innovative Master Controller by SolarBright regulates the function of the system and will only make it work when it is needed.

*Night operation requires charged battery, included in the Zephyr pack. Battery option for Zephyr model with 40 watt square panel. 20 watt models supplied with round panel, 40 watt with square panels.

Advantages of the **MAXBREEZE**[®] system

- ✓ Reduces heat & moisture build-up inside the roof cavity
- ✓ Reduces energy cost of running air conditioners
- ✓ Helps to make home more comfortable
- ✓ Protect roof insulation from moisture saturation
- ✓ Green product uses FREE energy
- ✓ No other product can match the features and price
- ✓ Pays for itself
- ✓ Smartest Solar roof fan in Australia
- ✓ Australian made, designed and owned
- ✓ 30 minutes easy DIY installation
- ✓ Works day & night (with optional battery pack)
- ✓ Sleek design with slim pitch
- ✓ Leak proof - fits all roofs and all locations
