

Company Profile

SolarBright is a family owned Australian company which manufactures, supplies, and installs a wide range of energy saving products including:

- Solar and batteries for home and business.
- Our Australian made MaxLight domestic and commercial skylights.
- Our MaxBreeze solar powered roof ventilation fans.

SolarBright are solar and battery experts. Since establishment in 2008 we are proud to have helped thousands of families and businesses save thousands off their power bills with the uptake of clean, renewable solar energy.

From our company owned and purpose-built facility in Prestons NSW, housing our head office, showroom, factory, and warehouse, we service greater Sydney, the Illawarra and the Central West.

Our Port Macquarie branch services Port Macquarie and the Mid North Coast area, and we have local consultants looking after Tamworth and New England, Coffs Harbour, the Central Coast, the Hunter Valley and Newcastle.

Since 2008 hundreds of solar companies have come and gone whereas SolarBright has grown from strength to strength and is now one of the largest solar installers in NSW.

SolarBright's well-established network of consultants and installers service customers in other states.

Credentials

SolarBright brings you peace of mind. You are choosing a long standing, professional company which is committed to exceptional levels of quality and service in the solar industry.

Due to this commitment SolarBright is recognised as an NETCC Approved Seller.

Because of our technical expertise and experience, Tesla has appointed SolarBright as a Certified Powerwall Installer. We are an authorised Sungrow partner, Max Power Solar partner and recognised with multiple high profile awards over the years.

SolarBright offers superior technology from the leading solar companies at accessible prices for families and businesses.

Team

SolarBright is a trusted family business and one of the largest and most experienced solar and battery installers in NSW. Since its foundation in 2008, the talented team has grown to over 25 staff, not including our installation teams.

The team is dedicated to making a difference to our customers – making it easy to go solar and lighting up their homes with Australian made MaxLight skylights.

SolarBright has up to 10 installation teams working across NSW.

Experience

The combined experience of the team is over 110 years. Since 2008 we have an outstanding record of over 17,000 installs from straight forward residential systems to technically challenging 300kW commercial systems.

The skill set of the team includes:

- Design of residential and commercial solar solutions with leading technology to meet each customers' specific requirements.
- Project management of commercial solar and skylight installations.
- Customer service and support pre and post installation.
- Solar installation by CEC Accredited Installers.

Our Customers

Our energy saving solutions suit:

Families and Households: We have helped thousands of families save thousands off their power bills with solar power and battery solutions. Our MaxLight skylights brighten thousands of customers' rooms, and our MaxBreeze solar roof fans help cool their homes.

Architects & Builders: We design and install skylight, solar and battery solutions for residential and commercial projects.

Commercial: We provide commercial skylight solutions and solar and battery systems for a wide range of businesses and organisations across diverse industries.

MaxLight Skylights

The energy rated MaxLight Tubular SkyLights are made in Australia by SolarBright with an industry best 20-year warranty. Letting in maximum light and minimum heat, they come in 3 sizes:

- ML250 for lighting smaller rooms such as hallways and bathrooms
- ML400 for larger rooms such as kitchens, lounge and dining rooms
- ML550 for commercial applications such as schools, offices and warehouses.

MaxBreeze Solar Roof Ventilators

Our Australian designed MaxBreeze Solar Powered Roof Ventilators are the high-tech version of the old whirly-bird.

Solar powered and thermostat controlled, they lower your energy requirements by helping cool your roof in summer. They also protect your home by preventing moisture build-up in the roof.

The new remote controlled MaxBreeze PLUS model is remote controlled, allowing you to control fan operation, fan speed, and adjust the thermostat and humidistat settings for auto on/off.

MaxBreeze ventilators are backed with a 10-year limited warranty.

Solar Systems

SolarBright designs and installs grid connected solar systems from 1kW to over 100kW+ in size using the best solar technology from industry leaders.

We provide customers with high quality systems at accessible prices that give years of trouble-free energy production.

Each system is designed using satellite based solar mapping software to provide every customer with the estimated power production and payback time for their system.

Solar Batteries

As households and organisations seek energy independence and to reduce rising electricity costs, solar batteries are increasingly popular and the payback time on batteries has never been better.

SolarBright are battery experts as well as a Certified Tesla Powerwall Installer. We design and install solar battery solutions from leading manufacturers such as Sungrow, SolaX, sonnen and Tesla.

We also add batteries to existing solar systems as well as installing electric vehicle charging stations.
